

H B PUDHINRAJ

Flutter Developer | Computer Science Engineer (Networking & Cyber Security)

hbpuhinraj@gmail.com | +91 7397018864 | Coimbatore, Tamil Nadu github.com/pudhinhb | linkedin.com/in/pudhinraj-h-b

CAREER PROFILE

Flutter Developer with 2+ years of hands-on industry experience building and leading cross-platform mobile applications, from architecture through Play Store and App Store release. Has independently built and shipped multiple live production apps, including a published pub.dev package and a SaaS product core. Strong foundation in computer science, networking, and cyber security, with a track record of client handling, project leadership, AI/ML experimentation, and end-to-end delivery.

PROFESSIONAL EXPERIENCE

Software Engineer (Flutter Developer) | Webnox Technology

Feb 2025 - Present

- Part of a 3-member engineering team; independently designed and delivered assigned apps solo, end-to-end, while also guiding and reviewing work for junior developers.
- Handled direct client communication and requirement gathering across 10+ client projects, including creating and managing Google Play Store and Apple App Store developer accounts and monitoring live apps post-release.
- Delivered projects for international clients, including Amaramba, a stock market app built for a client in Zimbabwe.
- Managing the release pipeline for iOS and Android, including builds, versioning, and pushing updates to the Google Play Store and Apple App Store.
- Built the core API/SDK for Temp Mail Blocker, a SaaS product for detecting and blocking temporary/disposable email signups, published as a Flutter package with ML-based detection, an admin dashboard, and a Next.js marketing website.
- Built Sprintly, an internal HRMS/team-lead tool for task assignment, attendance via fingerprint and face recognition, and WFH permission management, with a Dart backend and socket-based chat, voice, and video calling similar to Slack; now planned by the company as a SaaS product.

Software Engineer Intern (Flutter Developer) | Quasar Insight, Coimbatore, Tamil Nadu

Feb 2024 - Dec 2024

- Built and shipped UI features and bug fixes for a client-facing Flutter mobile application, collaborating with senior developers on sprint-based delivery.

Research Intern (Deep Learning) | Feng Chia University, Taiwan (TEEP)

Sep 2023

- Selected as 1 of only 4 students from college for the prestigious TEEP program; conducted "LiDAR Data Filtering Enhancement Techniques - Development and Validation using Deep Learning for Adverse Weather Conditions," applying deep learning to improve LiDAR data reliability in adverse weather.

Additional Internships: Juniper Networking, AICTE-Eduskill (May 2022) • Robotic Process Automation (Blue Prism, AICTE-Eduskill) (Oct 2021 - Nov 2022) • AWS Virtual Internship • Implant Training - Web Development, Crescent Technosoft, Bangalore (Dec 2022)

KEY PROJECTS

Temp Mail Blocker - SaaS Product | pub.dev/packages/temp_mail_blocker | [Chrome Web Store](#)

- Public Flutter package (see Webnox Technology experience above for build details); available for any Flutter app to integrate disposable-email detection at signup.
- Built and published the companion Temp Mail Blocker Chrome extension, validating emails and detecting disposable addresses in real time across web forms, spreadsheets, and inboxes via the product's dashboard API.

Sprintly - HRMS & Team Management Tool | *Internal project, planned as a SaaS product*

- Internal HRMS tool (see Webnox Technology experience above for build details); now being scoped by the company as an external SaaS offering.

TalkPay - Caller ID & Call Management App | [Live on Play Store / App Store](#)

- Built a Truecaller-style caller ID and call management app natively in Kotlin, including ad integration; 500+ installs on Google Play Store.

Taxiby - Ride-Hailing App (Ola/Uber-style) | [Live on Play Store / App Store](#)

- Built solo end-to-end: live socket-based ride tracking, Picture-in-Picture live location view on iOS, and full ride-hailing feature set; recently launched with 100+ installs across Play Store and App Store.

Amaramba - Stock Market App | International client project - Zimbabwe

- Built a stock market app for an international client in Zimbabwe, handling requirements and delivery directly with the client.

EDUCATION

B.Tech, Computer Science Engineering (Networking & Cyber Security) | Vel Tech Rangarajan Dr. Sagunthala R&D
Institute of Science and Technology, Avadi, Chennai 2020 - 2024
CGPA: 7.66

Higher Secondary, Computer Science | Krishnamal Ramasubbaiyer Mat. Hr. Sec. School, Madurai, Tamil Nadu 2019 - 2020

Secondary | Krishnamal Ramasubbaiyer Mat. Hr. Sec. School, Madurai, Tamil Nadu 2017 - 2018

SKILLS

- Dart, Flutter, Kotlin (native Android), Firebase, Supabase, Python, Next.js, Machine Learning, Deep Learning, Kali Linux, Android Studio, Xcode, Google Play Console, App Store Connect

AREAS OF INTEREST

- AI-infused applications, AI model training and applied machine learning, App Development, Cyber Security, Deep Learning

CERTIFICATIONS

- Microsoft Azure AI Fundamentals (AI-900)
- Cisco CCNAv7: Introduction to Networks
- Cisco: Introduction to Cyber Security
- Cisco PCAP: Programming Essentials in Python
- Mendix: Rapid Developer

CO-CURRICULAR ACTIVITIES

- Webinars: Web Development, Business Ideas & Skills, NVIDIA Cloud Computing
- Workshops: NVIDIA - Fundamentals of Deep Learning; AI Trends and Technologies; Business Model Canvas (BMC); IoT Workshop - IIT Chennai

PERSONAL DETAILS

Date of Birth: November 03, 2002 | Place of Birth: Virudhunagar, Tamil Nadu | Gender: Male | Nationality: Indian
Languages: English, Tamil | Hobbies: Football, Reading Novels, Movies, Travel
